

Configurare Digital Sending HP LaserJet 9000mfp (Nr. Produs: Q2622A)

Pentru configurarea optiunii "Send to e-mail" pentru multifunctionala **HP LaserJet 9000mfp**, aveti nevoie :

- 1. Sa stiti in primul rand Adresa IP (Internet Protocol) a serverului SMTP (Simple Mail Transfer Protocol) din retea sau din afara retelei;
- 2. De un server de e-mail local care va face legatura dintre multifunctionala si casuta de e-mail (interna sau externa) ;
- 3. Cel putin o casuta de e-mail valida.

Optional, pentru cei care folosesc o versiune de Windows Server, puteti avea acces la serverul de LDAP (Lightweight Directory Access Protocol). Serverele de LDAP memoreaza adresele de e-mail si numele, facand o asociere intre acestea, de tipul Nume(lon Popescu), E-mail (<u>ipopescu@yahoo.com</u>).

Nota: (Daca nu cunoasteti adresa de IP sau serverul de LDAP din reteaua din care faceti parte, va trebui sa intrebati administratorul de retea)

Pe Cd-ul primit din partea Ecocart Holding SRL, veti putea gasi un kit de instalare pentru hMailServer Administrator(un software gratuit), cu ajutorul caruia veti putea configura un server de e-mail pe reteaua din care faceti parte.

Mai jos aveti un exemplu de configurare a optiunii "Send to e-mail" ;

Dupa instalarea multifunctionalei HP LaserJet 9000mfp , verificati adresa IP care i-a fost alocata .

1. Mergeti in Start->Devices and Printers ;

2. Click dreapta pe multifunctionala Si selectati Printer Properties;

3. Mergeti la tab-ul Ports si apasati configure;

FIND LDAP TIMEOUT	5 (5	- 75)
FIND SEND GATEWAYS		
TEST SEND GATEWAYS		
Cancel	Apply	

- 7. Instalati hMailServer Administrator, iar apoi deschideti aplicatia.
- 8. Adaugati un nou Domeniu:

📓 hMailServer Administrator - [local	lhost]			
<u>F</u> ile Help				
	*	Domains		
itok.rc		Domain name	Enabled	Add
				Edit
Alases				Remove

9. Scrieti adresa serverului unde sunt configurate adresele de e-mail, iar apoi apasati Save in dreapta jos:

itok.ro	General	Names	Signature	Limits	DKIM Signing	Advanced
	Domain					
	itok.ro					
Aiases	🔽 Enat	bled				

10. Mergeti la Accounts, iar apoi adaugati 2 conturi, unul de pe care imprimanta sa trimita fisierele scanate, iar altul pe care sa le primiti:

hMailServer Administrator - [localhost]	
<u>F</u> ile Help	
Status Domains	contact@itok.ro
e di itok.ro	General Auto-reply Forwarding Signature External accounts Rules Active Directory Adva + >
florin@itok.ro	Address contact @ Itok.ro
Aliases	Password
Rules	<< Encrypted >>

11. Mergeti la Settings->Protocols->SMTP->Routes, si adaugati una noua :

	RORIO
